

Setting up Mail for Mac OS 10.0 – 10.1.5

This is the opening screen for Mail.app under Mac OS 10.0 – 10.1.5. You will only get this window displayed if the computer has never been set-up for E-mail access.

Welcome to Mail
You have no email accounts configured to use Mail. Please enter the following information to send and receive email.
Your Name: John Smith
Email Address: username@isp.net
Incoming Mail Server: pop.isp.net
Mail Server Type: 💿 POP 🛛 🔿 IMAP
User Name: username
Password: ••••••
Outgoing Mail Server: smtp.isp.net
? Quit OK

If the computer has been configured for E-mail in the past, click on the *MAIL* menu and choose *PREFERENCES*.

Then click on the ADD ACCOUNT button.
